5th Technology Forum

16/05/2018, 9:00-19:00

Aristotle University Research Dissemination Center, Thessaloniki, Greece

ANNOUNCEMENT #2

In the modern economic environment, competitiveness relies upon the development of innovative products. Knowledge combined with the right technological tools are key elements in the process of developing innovative products & services. Knowledge of such tools exists in both industrial bodies (ICT & other industries) as well as in research organisations (Universities & Research Centres). Therefore, their collaboration is important towards developing innovative products with international perspective.

In this context, 20 bodies have joined forces to organize a series of congresses under the name "Technology Forum". The program of the 5th Technology Forum (www.technology-forum.eu) will be including the following.
