1st International Urban, Environment And Health Congress

1st International Urban, Environment and Health Congress was held on 11-15 May 2016 in the Turkish Republic of Northern Cyprus.

The first gathering of urban, environment and health workers in this congress has contributed to the realization of the 2020 objectives and strategies.

As a result of presentations and discussions in the urban, environment and health issues, the Primary

Deliverables of the Congress are determined as follows;

- Collaboration on urban, environment and health fields is essential.
 - In order to attain cooperative action in all three fields, a working language is needed.
 - Local administrations should establish the basis of cooperation.
 - The International Urban, Environment and Health Congress must be held regularly.
- "We are happy if we are healthy. The healthier the environment, the happier we are."

"We are happy if we are healthy. The healthier the environment, the happier we are."
